

With proven techniques and latest advances in neuroscience, we approach recovery with education, Bible studies, group counseling, and vocational therapy. Genesis Ministries is working to raise awareness about addiction and provide solutions for recovery. The organization invites community leaders, professionals, and individuals who have recovered from addiction to share their stories. Genesis Ministries provides a Christ-centered approach to addressing the mental, emotional, and spiritual needs of those struggling with addiction. Our program includes a highly structured, multi-disciplinary, and residential program, as well as outpatient solutions and classes. The ministry is dedicated to fulfilling their mission of helping those in need in a Christ-centered way.
